

COTES MOBILE CR120B-CR400B

COTES MOBILE CR120B-CR400B

IDEAL FOR

- Water damage
- Flood
- Water Works
- Renting companies
- Dry air storage
- Object dehumidification

- A REG. AIR/PROCESS AIR INLET
- B DRY AIR OUTLET
- C REG. AIR OUTLET

Description

The CR-B desiccant dehumidifiers consist of 5 small dehumidifiers designed for temporary tasks such as drying-out buildings, but can be used in stationary installations, too. The operating principle is adsorption and the rotor is silica gel as standard.

Features

- > Cabinet manufactured in stainless steel
- > Low weight and small dimensions compared to capacity
- > Handles for easy carrying and piling
- > High capacity, at low temperatures as well
- > Deep drying at reduced process air flow
- > Pressure available for external connected ductwork
- > Power supply: 230V, 1N+PE
- > Hygostat connection with built-on connector
- > Easy access for internal cleaning and for service
- > High performance desiccant rotor of silica gel, washable

Applications

This range of dehumidifiers is designed for drying-out buildings, new buildings as well as water-damaged buildings. Furthermore, they are used for room air dehumidification, dry air storage, water works and pump stations.

The company policy of making quality products has resulted in dehumidifiers characterized by high reliability, low maintenance costs, maintainability and high capacity. Furthermore, these adsorption dehumidifiers are characterized by high capacity at low temperatures and additional room heating is normally not necessary.

Controls

All Cotes humidity controls, DR10, DA20, DH24, DCC, can be used for the CR-B dehumidifiers. The choice depends on the degree of accuracy needed and external user information.
