

Direct expansion evaporators **REDB**

Glycol air coolers **RGDB**

Main product features

Air coolers suitable for **fluid refrigerants** HFC's and glycol

Over than 1400 different models for banana rooms with 1, 2 or 3 pallet levels and for 6 to 30 pallet

Lighting integrated in the air cooler and air heating with electric heaters

Hinged fan panels for easy access

Cooling capacity from 10 to 90 kW (SC2 conditions)

Fans diameter 500 - 560 - 630 mm

Fin spacing 4 - 5 - 6 mm

Casing manufactured from galvanized steel with powder coating

Heat exchanger: configuration with high thickness tubes and fins for heavy applications. Optimized heat exchanger volume and innovative refrigerant distribution refrigerant.

Options: Reversible fans, EC fans, stainless steel tubes, stainless steel casing, stainless steel fins, coil coating.

Special configurations please contact our sales department
